

Derrick Streets

Full-Stack TypeScript and Next.js Developer

Slidell, Louisiana 70461 (985) 718-2594 derrickstreets397@gmail.com github.com/dstreets9

PROFILE

I build production web applications across the frontend, backend, and data layer. Recent work includes a Next.js migration, maintenance across seven live websites, and reporting that helps teams understand revenue and advertising performance.

EXPERIENCE

Pelican New Orleans — Web Developer

April 2025 – present

JavaScript · React · Next.js · Node.js · Express · WordPress · SQL · PostgreSQL · Power BI · Google Tag Manager

- Migrated a legacy WordPress and jQuery site to Next.js to improve load speed and SEO
- Maintain seven production websites: 2 Next.js and 5 WordPress
- Developed automated Power BI financial reports that surface trends across the client base
- Configured Google Tag Manager to track revenue and advertising spend across the organization
- Built Node.js services that trigger Mailchimp email marketing flows from customer actions

MyCritters — Full-Stack Developer Intern

June 2024 – April 2025

TypeScript · React · Lexical.js · Tailwind CSS · Node.js · Hasura · GraphQL · Apollo · PostgreSQL · Docker

- Developed a rich-text editor with document versioning, URL-based routing, automatic keyword highlighting, and parsing for database storage
- Managed role-based GraphQL API permissions and implemented PostgreSQL triggers

Timeline Inc. — Frontend Developer Intern

August 2024 – November 2024

JavaScript · React · Redux · MUI · Axios · Jest · Playwright · React Testing Library · Datadog

- Developed a dashboard for managing client engineering teams with React, Redux, MUI, and AG Grid
- Wrote unit and integration tests with Jest, React Testing Library, and Playwright
- Configured Datadog for real-user monitoring and session replays

PROJECTS

EO Digest

derrickstreets.wiki/work/eo-digest

Built an automated Federal Register pipeline that generates source-linked summaries and validates citations before publication. Next.js, Node.js, LLM API, and PostgreSQL.

Playlist Builder

derrickstreets.wiki/work/playlist-builder

Built a single-screen Spotify playlist tool using OAuth 2.0 with PKCE, Spotify Web API integration, and optimistic updates. React and Node.js.

TECHNICAL SKILLS

Languages	TypeScript, HTML, CSS, SQL, GraphQL
Frameworks and libraries	React, Next.js, Node.js, Redux, MUI, Tailwind, Express, OAuth 2.0, Jest, Mocha
Developer tools	Git, Docker, npm, Yarn, Postman, DBever, Lighthouse, Datadog, Google Search Console, Google Analytics, Google Tag Manager, Power BI
